TECNICAS EVAPORATIVAS, S.L.

## DRY-COOLERS

FR.35.01-AER

### AER Series

The AER series have a range of total 29 models with small diameter fans allocated on the outside. The set of motor, fan and volute are only one piece, offering a low noise level.

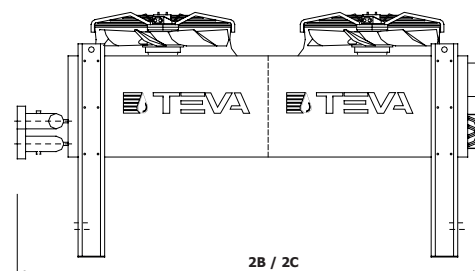

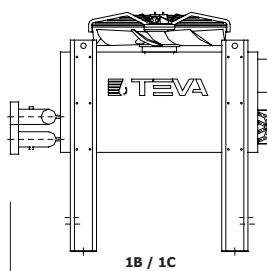

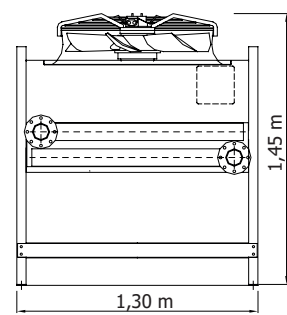

**Axial fans, direct motor  
shaft coupling**

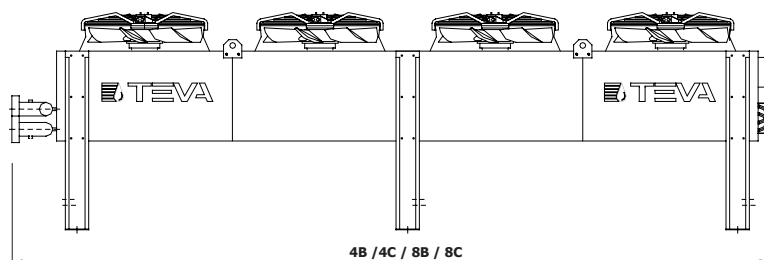

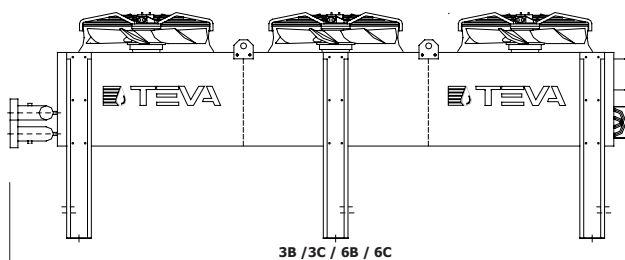

**From 2 up  
to 6 motors**

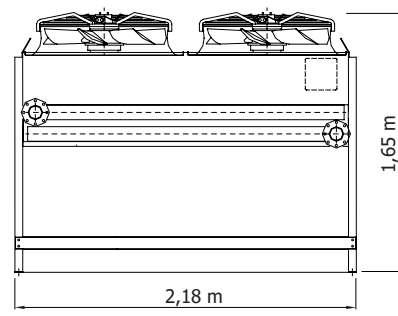

| Model     | Quantity x kW Motors |
|-----------|----------------------|
| AER 1B302 | 1 x 2                |
| AER 1B303 | 1 x 2                |
| AER 1C303 | 1 x 2                |
| AER 1C304 | 1 x 2                |
| AER 1C305 | 1 x 2                |
| AER 2B302 | 2 x 2                |
| AER 2B303 | 2 x 2                |
| AER 2C303 | 2 x 2                |
| AER 2C304 | 2 x 2                |
| AER 2C305 | 2 x 2                |
| AER 3B303 | 3 x 2                |
| AER 3B304 | 3 x 2                |
| AER 3C303 | 3 x 2                |
| AER 3C304 | 3 x 2                |
| AER 4B304 | 4 x 2                |
| AER 4C303 | 4 x 2                |
| AER 4C304 | 4 x 2                |

| Models | Large  | Wide                                                                                | Height |
|--------|--------|-------------------------------------------------------------------------------------|--------|
| 1B     | 1,54 m |  | 1,45 m |
| 1C     | 1,85 m |                                                                                     |        |
| 2B     | 2,75 m |                                                                                     |        |
| 2C     | 3,36 m |                                                                                     |        |
| 3B     | 3,96 m |                                                                                     |        |
| 3C     | 4,86 m |                                                                                     |        |
| 4B     | 5,17 m |                                                                                     |        |
| 4C     | 6,37 m |                                                                                     |        |

| Model      | Quantity x kW Motors |
|------------|----------------------|
| AER 6B523  | 6 x 2                |
| AER 6C523  | 6 x 2                |
| AER 6C524  | 6 x 2                |
| AER 8B523  | 8 x 2                |
| AER 8C523  | 8 x 2                |
| AER 8C524  | 8 x 2                |
| AER 10C523 | 10 x 2               |
| AER 10C524 | 10 x 2               |
| AER 12C523 | 12 x 2               |
| AER 12C524 | 12 x 2               |
| AER 12C525 | 12 x 2               |
| AER 12C526 | 12 x 2               |

| Models | Large  | Wide                                                                                  | Height |
|--------|--------|---------------------------------------------------------------------------------------|--------|
| 6B     | 3,97 m |  | 1,65 m |
| 6C     | 4,89 m |                                                                                       |        |
| 8B     | 5,19 m |                                                                                       |        |
| 8C     | 6,39 m |                                                                                       |        |
| 10C    | 7,91 m |                                                                                       |        |
| 12C    | 9,41 m |                                                                                       |        |
